ADDITIONAL INFORMATION

COMMENTS or ADDITIONAL INFORMATION:

Anything else you'd like to share with us? If you or your session experts like to tweet or blog, name the details here and we will follow!

DO YOU WORK WITH TECHNOLOGY OR DATA?

We ask this question for a very specific reason: we are inviting a group of ICT experts to attend the IACC and we're trying to get a sense of a) what percentage of the IACC constituents are currently using technology or online tools for the purposes of increased transparency, accountability and participation, b) how do you think the ICT experts attending the IACC could plug into or assist you with your work, and c) if you have data sets would you be interested in participating in a data mash-up or data visualisation sprints?

If you are already using technology in relation to your work outlined in this session proposal, it would be great if you could write a few words about it.

FUNDING SOURCES:

Is the registration fee, travel and accommodation financing secured for this session?
If not, how will the necessary funding be secured?

PARTICIPANTS:

Has this proposal been prepared with all invited participants?*

If not, please specify who has prepared the proposal:
