Organizer of Education Commission Report Launch

educommission @educommission

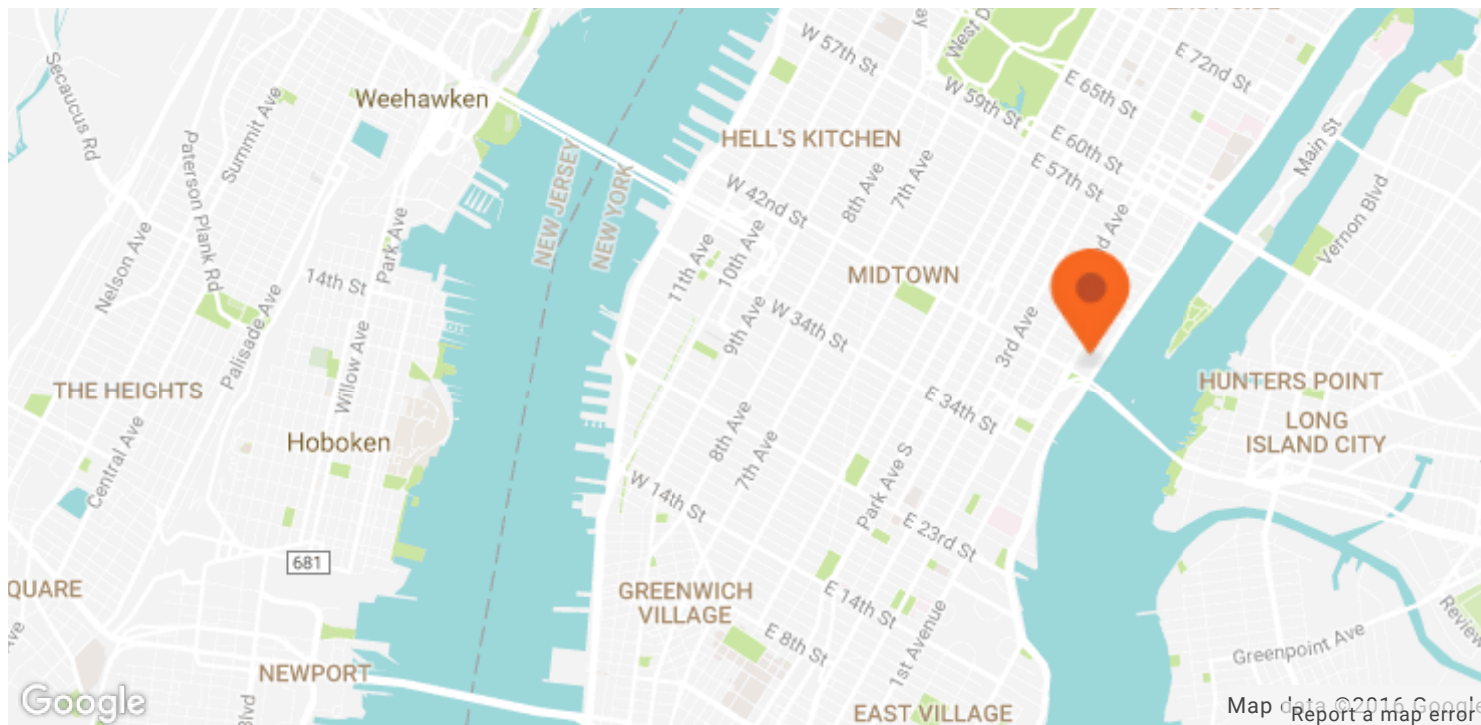

The International Commission on Financing Global Education Opportunity is a major global initiative engaging world leaders, policy makers and researchers to develop a renewed and compelling investment case and financing pathway for achieving equal educational opportunity for children and young people.

The Commission brings together the best research and policy analysis on the actions necessary to increase investment in concrete, relevant learning outcomes that have a positive impact on economic and social development. The Commission aims to secure increased, more effective investments and contribute to the mobilization of new partnerships to achieve these aims, particularly in middle-income and low-income countries.
